Thank you for receiving this resume. In summary, I have been working in my music recording studio for 10 years, but I have made the decision to seek a new path, preferably one involving technology. I have been studying web development for some time, and after practicing with personal projects and learning technologies such as JavaScript, typescript, css, html, node, express, nextjs, React, among others, I think I can be useful in your company.

Give me the opportunity to show you my knowledge and my ability to solve problems, and with a positive attitude, I will give you all of me for your company.
